This is my resume. There are many like it, but this one is mine. My resume is my best friend. It is my life. I must master it as I must master my life. Without me, my resume is useless. Without my resume, I am useless. I must tailor my resume perfectly. I must target more accurately than other applicants who are trying to overtake me. I must get the position before they get it. I will... Before Laszlo Bock I swear this creed. My resume and I are the defenders of my career. We are the masters of the job market. We are the saviors of my life. So be it, until there is no work, but happy hour, cheers!

Education

- 2010-2014 **PhD, Computer Science**, *Awesome University*, MyTown
(expected) Thesis title: Deep Learning Approaches to the Self-Awesome Estimation Problem
- 2007-2010 **BSc, Computer Science and Electrical Engineering**, *University of HomeTown*, HomeTown
- Minor: Awesomeology
 - Major: Awesome Science

Experience

- 2010-2017 **Awesomeness manager**, *awesomia*, moon
- Short text containing the type of work done, results obtained, lessons learned and other insightful remarks.
- Here too, ending a line with a backslash forces a line break. List items do a line break by definition. But regular consecutive paragraphs get concatenated into one unless backslash is used. Can also include lists and links:
- First item
 - Item with [link](#). Links will work both in the html and pdf versions.
- 2017-2020 **That Other Job You Had**, *at company*, Saturn
- Also with a short description.
- And more description

Personal projects

- Awesomizer [github.com/githubuser/superlongprojectname](#), *LOLCODE*
- For items which don't have a clear time ordering, a definition list can be used to have named items.
- These items can also contain lists
 - And nested lists
 - But you need to mind the indentation levels in the markdown source.
 - Second item.
- Linux** [kernel.org](#), *JavaScript*
- Kernel** implemented multithreading over a long weekend
- node.js** which was actually totally my idea. **COBOL** Implemented a web server in COBOL as a joke, but it actually worked.
- Special relativity derived the famous equation $E = mc^2$ in my spare time

You can use a `\filbreak` directive to prevent orphaned headers.

cvlistitem

- Item 1
- Item 2
- Item 3

cvlistdoubleitem

- Item 1
 - Item 2
 - Item 3
- Item 4
 - Item 5
 - Item 6

Just paragraphs

This is a paragraph. It will be treated as a single block of text, even if it is written as multiple lines in the markdown source. To have multiple paragraphs, you need to separate them with a blank line.

Skills

Basic knowledge

C , x86 assembly, **forth**, Common Lisp

Advanced knowledge

Lua , **Pandoc**, $\LaTeX$

Languages

Klingon native speaker

English so-so

Spanish Por qué?
